

Andrew Russell

4A Software Engineer

ajrussell.ca

deadhead.russell@gmail.com

1-226-789-3957

EDUCATION

University of Waterloo; Sep 2008 - Apr 2013

Candidate for Bachelor of Software Engineering, Honours Software Engineering

RELEVANT COURSES

Speechboard (Design Project)

- Automatic transcription application for meetings, with a large focus on simplicity for users
- Developing an algorithm that analyzes voice data to determine who is speaking at what time
- Algorithm analyzes frequency spectrum of voice and creates a voice print for each speaker

Computational Vision (CS 484)

- Learned digital signal processing techniques for image processing
- Developed a program for recognizing how images go together and composed the images into a panorama
- Implemented a panoramic stitching program in Matlab

Introduction to Computer Graphics (CS 488)

- Lectures gave a broad overview of many graphics concepts
- Developed a final project implementing flocking, L-System, terrain erosion and water rippling systems

Other Related Courses

- Digital Signal Processing (ECE 413)
 - Numerical Computation (CS 370)
-

AWARDS

- President's International Experience Award; Spring 2012
 - Leslie Klein Engineering Entrance Scholarship; Fall 2008 & Winter 2009
 - University of Waterloo President's Scholarship of Distinction; Fall 2008
-

TECHNICAL SKILLS

Software Development

- Strong understanding of developing device drivers for different types of hardware
- Extensive experience of audio and image signal processing in C/C++ and Matlab
- Good knowledge of computer graphics programming techniques

Web Development

- Very strong client-side web application development skills (HTML, JavaScript and CSS)
- Familiar with a number of server-side languages including Google Go, JavaScript (node.js) and Java

WORK EXPERIENCE

Research Intern, Primal Inc., Waterloo, Ontario; Sep - Dec 2012

- Investigated a new algorithm for scoring web content against concepts
- Designed a new algorithm for converting user queries into concepts and then synthesising new concepts
- Researched combining synthesis results together to store user intent over multiple queries
- Will be listed as a collaborator on multiple patent applications

Software Engineer Intern, Microsoft Corp., Redmond, Washington; Jan - Apr 2012

- Ported a virtual surround sound processing library from Windows to an Xbox 360 device driver
- Improved CPU performance by over 750x and memory usage by over 5200x with help from a code profiler
- Worked with testing engineers to ensure code quality and program managers to ensure that the code met the spec

Software Engineer Intern, Google Inc., Mountain View, California; May - Aug 2011

- Added accessibility for low-vision and blind users to the Pepper Plugin API (PPAPI)
- Modified existing Native Client applications to work with the new PPAPI version
- Added accessibility to existing Native Client applications

Software Engineer Intern, Sybase iAnywhere, Waterloo, Ontario; Sep - Dec 2010

- Researched the possibility of replacing native mobile applications with web applications
- Developed a JavaScript library to create native quality mobile web applications
- Cloned a CRM native application as a web application, matching performance

Software Engineer Intern, Qualcomm Innovations Center, San Diego, California; Jan - Apr 2010

- Worked with the Symbian OS Multimedia Audio Team
- Designed and developed a physical device driver for the Windows emulator
- Wrote a debugging tool to log running processes on the target device

Ground Segment Intern, Canadian Space Agency, Saint-Hubert, Quebec; Apr - Aug 2009

- Launched an internal development application using Java, JSP and JavaScript
- Wrote SQL queries for Oracle 10g Database

PERSONAL PROJECTS

Source code for most personal projects can be found at: github.com/deadheadrussell

Personal Website

- Used node.js and Google Go to implement the server
- Strong focus on client side JavaScript
- Used HTML5 (JavaScript and CSS3) technologies with fallbacks for legacy browsers

Soccer Emulator

- Created a text-based soccer game simulation that takes team stats as input
 - Outputs play by play game summary and final scores
 - Simulated various single game issues such as morale
 - Developed a learning mechanism so that teams would improve after each game
-

OTHER INTERESTS

Music

- Perform, compose and record music on various instruments
- Have played piano in multiple musical theatre performances
- Instruments include the guitar, piano, upright bass, drums, vocals and mandolin

Sports

- Class athletic representative, organizing teams, liaisoning with the league and developing plays
- Captain of soccer, volleyball, ultimate frisbee and slo-pitch intramural teams
- Played many competitive sports including allstar teams in soccer and baseball
